List of PCO-Approved Sanitizers for Organic Dairy Operations

This is a list of products that are approved by PCO for use as sanitizers on equipment without a rinse. Equipment on dairy operations includes bulk tanks, pipelines, buckets, and other surfaces that may contact organic dairy products.

- Chlorine products must be allowed to drain and dry thoroughly.
- All label restrictions for these products must be followed.
- Products not listed here must be reviewed by PCO before using without a rinse.
- EPA registration numbers are listed when applicable, so that products on this list can be identified by the EPA registration numbers on product labels.

Because organic dairies need to comply with other regulatory programs in addition to NOP organic regulations, consult with your milk inspector before using any of these materials to ensure compliance with other regulatory programs, as applicable to your operation. Clorox Regular Bleach (EPA Reg. No. 5813-50) is NOT allowed as a sanitizer without a rinse due to synthetic additives.

These products are listed on the current PCO Material Reviews List. This list of approved sanitizers expires on 6/30/2012, although PCO may provide additional notification of any changes before that time. An updated version of this list will accompany each future PCO Material Reviews List. Products that are allowed as sanitizers on equipment without a rinse are listed in the Cleaners/Disinfectants/Sanitizers category with the following restriction: *(R) No rinse required on equipment*. You may also verify the status of any material by contacting PCO.

Chlorine Products

Name	Manufacturer	EPA Reg. No.
AFCO 0546	Alex C. Ferguson, Inc.	550-199-883
AFCO 0251	Alex C. Ferguson, Inc.	550-199-883
