List of PCO-Approved Sanitizers for Organic Processors

This is a list of products that are approved by PCO for use as sanitizers on equipment and food contact surfaces without a rinse.

- Chlorine products used on equipment and food contact surfaces must be allowed to drain and dry thoroughly.
- These products are also allowed for use in direct food contact. See the chlorine restriction for chlorine products.
- All label restrictions for these products must be followed.
- Products not listed here must be reviewed by PCO before using without a rinse.
- EPA or FDA registration numbers are listed when applicable, so that products on this list can be identified by the registration numbers on product labels.

These products are listed on the current PCO Material Reviews List. This list of approved sanitizers expires on 6/30/2012, although PCO may provide additional notification of any changes before that time. An updated version of this list will accompany each future PCO Material Reviews List. Products that are allowed as sanitizers on equipment without a rinse are listed in the Cleaners/Disinfectants/Sanitizers category with the following restriction:
(R) No rinse required on equipment. You may also verify the status of any material by contacting PCO.

Chlorine Products

Chlorine Restriction §205.605(b): If chlorine products are used in direct food contact, residual levels of chlorine in water in direct food contact must not be greater than specified in the Safe Drinking Water Act (4ppm as chlorine or 0.8ppm as chlorine dioxide). If levels are higher than this, the product must be rinsed.

Name	Manufacturer	EPA Reg. No.
AFCO 0546	Alex C. Ferguson, Inc.	550-199-883
AFCO 0251	Alex C. Ferguson, Inc.	550-199-883
